SKILLS

Data & Analytics

SQL
Power BI
Advanced Excel

Core Methodologies

Requirements Gathering
User Stories & UAT Testing
As-Is / To-Be Mapping
Process Optimization

Systems & Tools

Salesforce (Academic training)
Python
ERD / SDLC

LANGUAGES

Hebrew — Native
English — Professional

PROFILE

Information Systems & Business Administration graduate (**GPA 90**) and certified Data Analyst, combining academic excellence with 11 years of high-stakes operational experience at Israel Railways. Proven track record of working under strict regulation and zero-error environments, with practical expertise in **advanced Excel, SQL queries, and system process mapping**. Bringing a rare combination of pressure-tested accountability, strong technical orientation, and a direct approach to solving operational bottlenecks.

EDUCATION

B.A. Business Administration & Information Systems

Ono Academic College | 2023 – 2026 | **GPA: 90**

- Information Systems Project Management:** Practical execution of Agile/Scrum methodologies, drafting technical system specifications, and managing development lifecycles.
- System Analysis & Integration:** Hands-on database modeling (SQL ERD design), cross-system mapping, and academic coursework covering core CRM/Salesforce configurations and ERP processes.

Practical Data Analyst Certification | Grade: 95

Tech-Career / Upscale Analytics | 2023

- Advanced data processing and modeling using SQL queries, Python, and Excel.
- Building interactive Power BI dashboards to track operational trends and key performance metrics (KPIs).

PROJECTS & INITIATIVES

Driver Portal – End-to-End System [link](#) | Independent Initiative

- Authored a comprehensive Business Requirements Document (BRD) for a digital solution serving 400+ users, defining user stories, process flows, and acceptance criteria.
- Developed a functional Python script to ingest PDF schedules, extract structured text, and automate data stream processing into a database.
- Designed technical data flows and REST API specifications to integrate with legacy operational and scheduling systems.
- Formulated a data-driven ROI model projecting a 30% reduction in manual inquiries and an estimated annual saving of 84,000 ILS.

EXPERIENCE

Passenger Train Driver | Israel Railways | 2015 – Present

- Operate and monitor complex onboard control and technology systems, performing real-time diagnostics, fault identification, and initial troubleshooting under pressure.
- Serve as the primary field-level point of contact for the National Operations Control Center (OCC), maintenance departments, and IT support teams to resolve technical malfunctions and maintain operational continuity.
- Adhere strictly to rigorous organizational safety protocols, regulatory demands, and tight SLA performance metrics in a documented, zero-error environment.

MILITARY SERVICE

Combat Medic Platoon Sergeant | Golani Brigade, IDF | 2009 – 2012

- Commanded a combat medic team, managing logistics, resource allocation, and high-stress operational responses under strict, high-reliability standards.
